DETAILED ACTION

1. This action is in response to communications filed January 21, 2005.

Examiner has withdrawn the finality of the previous action in light of the claims and applicant's remarks.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- A) Claims 1-11, 34, 35 drawn to a method and system for computer-to-computer protocol implementing classified in class 709, subclass 230.
- B) Claims 12-18, 36-41, drawn to a method for computer-to-computer handshaking class 709, subclass 237.
- C) Claims 19-33, drawn to a method and apparatus for computer-to-computer data routing classified in class 709, subclass 238.

3. The inventions are distinct from each other for the following reasons:
inventions A, B, and C, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility for encapsulating a fundamental network protocol, which is separately usable with or without inventions B and C. Invention B has separate utility for determining if a message segment constitutes a complete message, which is separately usable with or

without inventions A and C. Invention C has separate utility for routing a message between a protocol gateway and a server, which is separately usable with or without inventions A or B. See § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A shortened statutory period for response to this action is set to expire 1 **(one) month not less than 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
